

**C program to check odd or even using modulus operator**

**Factorial program in c using for loop**

**Program to Implement Structure with Array (use stu\_name,rollno,st\_he,st\_wt)**

**Strcat function is used to concatenate two strings**

**Strlen Function takes one argument which can be a string or constant. It counts number of characters in string.**

**Write a C language program of Swapping of two numbers**

**Write a C language program to get arithmetic operation by using switch statement**

**Write a C language program to get arithmetic operation by else if ladder**

**Write a C program addition of two matrixes**

**Write a C program to find largest number from given number**

**Write a C program to Find odd or even using conditional operator**

**Write a C program to find vowel or not**

**Write a C program to get factorial number by using function**

**Write a C program to get largest and smallest number by using array**

**Write a C program to get sum of digit number**

**Write a C program to perform all arithmetic operations by using switch**

**Write a C program to print odd or even series by using array.**

**Write a C program to print the student's information by using structure**

**Write a program to calculate factorial of given number using while loop.**

**Write a program to calculate sum of 2 numbers using function.**

**Write a program to read 10 numbers and print them On monitor screen using array.**

**Write C program to reverse a number**

**Write C program to reverse a number by using function**

**Write a C program to get salary slip for employee (use pay heads BASIC, HRA, TA, DA, TOTAL SALARY ) by using structure**

**Write a C program to print student's mark sheet result.**

**C Program to Find the Length of a String**

**Write a C program to find vowel or not by using function**

**Write a C program to enter name and address and print it**

**Write a C program to get sum of digit number by using function**

**Write a C program to print student's mark sheet result by using structure**

**Write a C program to find largest number from given number by using nested if else**

**Write a C program to find vowel or not by using else if ladder**

**Write a C program to get student information by using function**

**Write a C program to get sum of array element**

**Write a C program to print student's mark sheet result by using function**

**C program to check odd or even using modulus operator with user defined function**

**C program to use string function (strcat, strcmp)**

**Write a C program to enter name and address and print it by using function**

**Write a C program addition of two matrixes by using function**

**Write a C program to check alphabet by using conditional operator**

**Write a C program to check alphabet by using if else statement**

**Write a C program to check alphabet by using function**

**Write a C program to addition of three number by using function**

**Write a C program to print odd and even series by using function**

**Write a C program to get Employee salary Slip by using function(Basic,Hra,Ta,Da,pf)**

**Write a C program to get sum of array element by using function**

**Write a C program student is eligible for voting or not in public election**

**Write a C program student is eligible for voting or not in public election by using function**

**Write a C program to check alphabet by using conditional operator**

**Write a C program to check alphabet by using function**

**Write a C program to get Employee salary Slip by using structure(Basic,Hra,Ta,Da,pf)**

**Write a C program to get smallest number using array element**

**Write a C program to get sum of digit number by using function**

**Write a C program to print student's mark sheet result by using structure**
